## Orienge Presents Conterra FIM Ready-to-Use Solution for Efficient Invoice & AP Management

New York, New York, March 26, 2013 – Orienge, LLC (“Orienge”) introduces a new business solution [Conterra Financial Information Management \(“Conterra FIM”\)](#) for efficient invoice and accounting process management. Conterra FIM is aimed at streamlining AP processes and procedures at all stages, including invoice capturing, validation, approval, analysis, and reporting.

Conterra FIM is a complete software product built upon the Conterra Enterprise Content Management (ECM) platform, inheriting the platform’s power and agility as well as the expertise of Orienge specialists and over 1,300 international ECM customers.

Conterra FIM is intended for medium sized businesses to large enterprises. If a company deals with 1,000 or more invoices per month and the overall process involves more than 10 users (including approvers), Conterra FIM can significantly accelerate the accounting process, making it transparent and reliable.

Conterra FIM stands out as a powerful enterprise-level software solution combined with the simplicity of a web application. The solution is characterized by the following features:

- Simple web interface to facilitate accessing enterprise content
- Variety of software & implementation options
- Agility to adapt any specific business needs and requirements
- Ability to integrate with any other software solutions (ERP & Financial Reporting Systems)

“We believe that our new business solution, [Conterra FIM](#), has a very promising future,” said Daniel P. Shields, President and CEO of Orienge. “Orienge has always demonstrated automation of the AP/IM process for some time, but the clear benefits of the Conterra FIM design are awesome! In the first place, this software is functionally excellent, easy-to-use, adaptable, and bring clear benefits to the overall accounting process. Second, the software and implementation offer is simple and clear. Third, the risks are minimal as we focus on a very specific business challenge and offer a very clear solution to deal with it. Last but not the least, a company needs just 3 to 6 weeks to start experiencing the real benefits. 15 business days to get started is a challenge, but the Orienge team is ready to rise to it.”

More information on Conterra FIM is available at the official Orienge website [www.orienge.com/fim](http://www.orienge.com/fim). Feel free to sign up for a free demo, ask for more information concerning the Conterra FIM solution or get the brochure.
